Profile

I am an experienced Frontend Developer with over 9 years of professional experience, and for the last 5+ years, I have focused specifically on React.js and TypeScript. Currently, I work as a Lead Software Engineer at Roko Labs d.o.o. I specialize in building user-centric, intuitive web applications, designing scalable UI components and ensuring smooth, efficient data handling. My goal is to create seamless user experiences while maintaining high standards of code quality and performance. I am also deeply passionate about online privacy and security, and I am committed to developing applications that protect user data.
